✔ Successfully created load balancer: LabELB

It might take a few minutes for your load balancer to fully set up and route traffic. Targets will also take a few minutes to complete the registration process and pass initial health checks.

ℹ Introducing configurable log deliveries for ALB

Send Application Load Balancer logs to multiple destinations — CloudWatch, S3, or Kinesis Firehose — giving you greater flexibility in how you store, analyze, and manage logs. Visit [Logging](#) in the [Integrations](#) tab.

ℹ New ALB metric: Capacity Utilization

Monitor how much of your load balancer's available capacity was used to meet traffic demand. Available in both the [Capacity](#) and [Monitoring](#) tabs.
